

Eötvös Immunology PhD Seminar

in memoriam Prof. Janos Gergely

2018 May 25 (Friday)

9:30 – 11:00 Prof. **Niek de Vries** (Amsterdam Rheumatology and immunology Center)
BCR and TCR clonality analysis in autoimmune disease

11:00 – 11:15 Coffee break

11:15 – 11:30 **Bence Szikora** PhD student (Eotvos Lorand University)
BCR diversity analysis with Ig-seq technology in immunized mice

11:30 - 12:00 Prof. **István Csabai** (Eotvos Lorand University)
Big Data in Genomics

12:00 – 13:00 Lunch break (sandwiches)

13:00 – 14:30 Prof. **Johan van der Vlag** (Radboud university medical center)
Glomerular endothelial glycocalyx and heparanase in inflammatory kidney disease

14:30 – 14:45 Coffee break

14:45 – 15:15 **Markus Loeven** PhD student (Radboud university medical center)
2-O- and 6-O-desulfated heparins selectively compete for factor H-related protein 1 and 5, but not factor H binding to glomerular endothelial heparan sulfate

15:15 – 15:30 **Alexandra Papp** PhD student (Eotvos Lorand University)
Interactions of factor H-related proteins with the extracellular matrix
